

Cover Letter

Dear Hiring Committee,

I am pleased to apply for the Software Developer position. With over 5 years of hands-on experience in full-stack development across government and private organizations, I bring strong expertise in designing and building secure, scalable, and modern web systems.

I have extensive experience working with **Laravel, Vue.js, Next.js, Tailwind CSS, and building RESTful & GraphQL APIs**. I have developed and managed databases in **MySQL, MongoDB, Firebase, SQLite and Redis**, configured **Linux servers**, and deployed applications on both local and cloud environments.

Throughout my work at the Ministry of Interior, Ministry of Transport, Entire Thinker, and Mumtaz Eagle, I have contributed to full project cycles—system design, development, deployment, testing, and maintenance. I also collaborate effectively with designers, analysts, and technical teams to deliver high-quality and secure systems.

I am highly motivated, detail-oriented, and eager to support your digital development goals.

Thank you for your time and consideration. I look forward to the opportunity to contribute to your team.

Respectfully
Qudratullah Sharafat
